

Eight Decades of Trust & Innovation

ABOUT US

- Nicco Cables is a 80 year old brand based in India
- Nicco specializes in manufacturing wide range of Wires and Cables
- Nicco has an in-house R&D facility
- Nicco specializes in Compound manufacturing and has a dedicated team for Compounds
- Nicco is the first Company in India to install a 3 MeV Electron Beam Plant form USA for manufacturing irradiated cables
- The manufacturing plant covers an area of 450,000 sq.ft.
- Nicco has National Accreditation Board for Testing and Calibration Laboratories (NABL) accredited Testing laboratory

NICCO PRODUCES A WIDE RANGE OF CABLES

- Elastomeric & Silicon Cables (Upto 15 kv) for various application
- Flexible Trailing Cables - H07-RNF
- LT & HT Power & Control Cables (Upto 66 kv)
- Fire Survival Cables (For Nuclear Reactor)
- Ship Building Cables
- Medium Voltage Covered Conductors (MVCC)
- Automotive Cables
- Cable Harnessing
- Overhead transmission Conductors (AAAC, ACSR, AAC, ACAR , AL-59)
- Pressure Tight Cables
- PTFE, ETFE & FEP Cables
- Solar & Windmill Cables
- Hybrid / Composite and Underwater Cables
- TREE WIRE / SPACER Cables - 3 layer Track Resistant (upto 35kv)
- Rolling Stock Cables
- Ethernet Polyurethane Cables
- Ethernet Cables (Cat-5e, Cat-6a, Cat-7)

SOLAR CABLES

- Nicco Solar Cables deliver unmatched performance with cutting-edge Electron Beam Technology
- Designed to endure temperatures up to 120°C, these components provide a high current-carrying capacity and enhanced long-term durability
- They are ideal for PV systems, solar parks, and building-integrated modules
- Tested as per BS EN 50618:2014, ensuring global compliance and safety.
- Resistant to extreme weather, UV, and mechanical stress

WINDMILL CABLES

- Nicco Windmill Cables are built for efficiency, durability, and extreme environments
- Ideal for both onshore and offshore wind farms with minimal power loss and high performance. The range includes LT & MV cables up to 15 kV with E-Beam or chemical cross-linking
- Torsion cables, flexible copper/aluminum conductors, and EPR/XLPE insulation are available. Operating range from -40°C to 120°C, at altitudes up to 2500 m

MEDIUM VOLTAGE COVERED CONDUCTORS (MVCC)

- Nicco Medium Voltage Covered Conductors ensure safer and more reliable power distribution
- They come in insulated coverings to prevent accidental contact with trees or other accidental contacts and are ideal for challenging environments where overhead reliability is critical
- They are available in voltage ratings from 6.6 kV to 33 kV and are manufactured to meet IEC 61089, IS 398 Part II, and BS EN 50182/50397 standards

INSTRUMENTATION CABLES

- Nicco's Instrumentation Cables are vital for monitoring and controlling electrical systems by transmitting low-energy signals, especially in industrial environments
- Despite the rise of wireless technology, these shielded cables remain crucial in sectors like petrochemicals, steel, cement and fertilizer production
- Known for their durability and resistance to harsh conditions, they offer excellent electrical and thermal performance. Instrumentation cables vary based on insulation and shielding methods
- Common types include: PVC Instrument Cables, XLPE Instrumentation Cables, Elastomeric Instrumentation Cables, Overall Shielded Pairs/Triads and Individual Shielded Pairs/Triads

AUTOMOTIVE CABLES

- Nicco's Automotive Cables business unit offers a comprehensive range of automotive cables for both onboard and off-board applications
- Nicco manufactures and supplies cables in accordance with all international and Indian standards, such as ISO (International), JASO (Japan), SAE (United States of America), and IS 2465 (Indian), as well as based on the specifications of major international carmakers. AC & DC EV Charging Cables according to IEC & EN specifications are also in the manufacturing range
- Nicco identifies the latest technologies at an early stage and offers the best possible solutions to ensure that together we can master the challenges of the automotive industry

ELASTOMERIC TRAILING AND MINING CABLES

- EPR Insulated Power Cable up to 15 KV
- Control & Instrumentation Cables
- Silicon Cables up to 15 KV
- Reeling /Unreeling duty cables for Steel/ Cement/ Mining/ Power Plant/ Chemical plants
- Rubber Trailing Cable for Electrical machines, Steel Mills, EOT Cranes, Coal Handling and Conveyors, Construction equipment, Turbines, Textile machines, etc
- Festoon Duty Cable
- Composite Cable
- Hybrid Cable with Optical Fiber Cable
- Under Water Cable
- Drag Chain Cable
- Pliable Armoured Flexible Cable
- Collectively Screened Flexible Cable
- 5-Core Drill Cable up to 15 KV
- 6-Core Individual Power Core Screened Cable up to 15 kV

SHIPBUILDING/ MARINE CABLES

- Power Cable
- Pressure Tight Cable (PT-10, PT-45, etc)
- Degaussing Cable
- EMC & VFD Cable
- Silicon Cable (Extruded & T-Type)
- Instrumentation Cable
- Shore Supply Cable
- Ethernet/ Data Cable (CAT -5e, CAT-6, CAT-6A, CAT-7)
- German Specs - FMGSGO, LMGSGO
- Radio Frequency (RF) Cable
- Russian Specs - KNRET, KNRETE & other types

RAILWAY CABLES

- Thin Walled Flexible Elastomeric Cables with Copper Conductor for Working Voltage Up to 750 Volts & Above 750 Volts Up to 1.8/3.0 KV
- Set of Single Core and Multi Core for WAG-9 and WAP-4 locomotives
- Railway rolling stock high temperature power cables having special fire performance (Single core, silicone rubber insulated cables for 120 °C and 150 °C)
- Railway Rolling Stock Power & Control cables having special fire performance (BS EN 50264)
- Railway Rolling Stock cables having special fire performance (BS EN 50306)

UL CABLES

- AL XHHW, XHHW-2, XHH -UL 44
- CU XHHW, XHHW-2, XHH -UL 44 2000 V Thermoset Photovoltaic (PV) Wire – UL 4703

OVERHEAD CONDUCTORS FOR TRANSMISSION

- Medium Voltage Covered Conductors up to 33 KV with AAC/ AAAC/ ACSR/ AL-59-ACS
- Overhead transmission Conductors – AAAC, AL-59, ACSR, AAC, ACAR, etc

CABLE HARNESSING

- Nicco offers complete cable and harnessing solutions for the solar and wind energy sectors
- Nicco's state-of-the-art wire harnessing facility ensures precision and top-quality assembly
- The cables are curated with advanced hand and hydraulic crimping tools for versatile operations, backed by a team of highly trained and experienced professionals
- Nicco delivers reliable, ready-to-install solutions tailored to wind applications

CERTIFICATE OF EXCELLENCE

EXISTING CERTIFICATIONS

ISO 9001 / 14001 / 45001

Directorate of Quality Assurance (Navy) [DQAN] Registration Certificate

Defense Research and Development Laboratory (DRDL) Registration Certificate

Integrated Headquarters of Ministry of Defence (IHQ/DEE/MOD)

Research Designs and Standards Organization (RDSO)

American Bureau of Shipping (ABS)

Indian Register of Shipping (IRS)

Underwriters Laboratories (UL)

Central Power Research Institute (CPRI)

Bureau of Indian Standards (BIS)

International Railway Industry Standard (IRIS)

National Accreditation Board for Testing and Calibration Laboratories (NABL)

Det Norske Veritas (DNV)

Nicco Cables Pvt. Ltd.
